AYURVEDA: THE MEANING OF LIFE is the first scientific event devoted to MAN, who is considered the result of the interactions between Awareness, Environment and Health, i.e. the three main issues that influence the existence of each human being.

Our relationship with Nature has been changing; the thread that once linked us to it has gradually weakened and our roots are no longer solid. Nature has even modified the ways in which it manifests itself: sudden climate changes, catastrophes and environmental emergencies that have caused “new diseases”, allergies. These are signs of the fact that we are moving away from Nature, which sometimes seems to have become an “enemy”. In such a situation, full of trouble, bewilderment, uncertainty and, sometimes, even fear, it is increasingly difficult to find or give a meaning to life, which seems more and more casual and unsafe.

Ayurveda interprets these “new” facts with precision; its ancient wisdom comes from a particular and deep analysis of life and of the world, as well as from its consequent perspective. Ayurveda is the traditional Indian medicine which – although in existence for thousands of years – is intrinsically modern, scientific and perfectly assimilated by the Indian National Health Service.

The aim of the Congress is to direct the attention to the relationships that shape the Nature that connects living beings with environment, and to establish a bridge between Western as well as Vedic scientific thinking in order to find a common ground to further expand our knowledge and depiction of Reality. This attempt is urged by the need to find new solutions and behaviors adapting to the big changes in nature that our world is facing and which stress the importance of our relationship with the environment. The awareness of the interrelationships, which shape our world, will be determinant in the improvement of our health and quality of life.

Dr. Antonio Morandi

Chairman & Director, Ayurvedic Point, Italy

President, Italian Scientific Society for Ayurvedic Medicine, Italy

The congress is addressed to doctors, biologists, nutritionists and health workers specialised in natural medicines.

CME credits for doctors and biologists have been requested.

Official language: English and Italian are the official languages of the Congress; translation service (on headphones) is available.

Ayurvedic Point has maintained scientific and cultural relationships with the cradle of this ancient culture for years and it found in its Indian partner Asthavaidyan Thrissur Thaikat Mooss' SNA Oushadhasala the enlightenment and the spiritual strength to bring the power of vision to reality. Thanks to this collaboration and to the Italian Scientific Society for Ayurvedic Medicine it has been possible to carry out this fascinating project.

Speakers

Prof. Brian D. Josephson

He is a Welsh physicist who became a Nobel Prize laureate in 1973 at the age of 33. He is interested in the possible relevance of Eastern mysticism to scientific understanding. He is the head of the Mind-Matter Unification Project at the Cavendish Laboratory, Cambridge.

Prof. Bhushan Patwardhan

Professor and Director, Interdisciplinary School of Health Sciences, University of Pune, he is one of the globally cited top 10 authors of Journal of Ethnopharmacology. Member of Taskforce on AYUSH, he is Editorial Board Member of Oxford Journal Press Journal Evidence Based Complementary & Alternative Medicine.

Dr. Alex Hankey

He is currently Consultant Professor of Yoga and Physical Sciences at the SVYASA Yoga University in Bangalore, India. He is on the editorial boards of four international journals in traditional, complementary and alternative medicine (TCAM).

Prof. Ram Harsh Singh

Emeritus Professor at the Faculty of Ayurveda at Benares Hindu University BHU, he is a Fellow of the Indian National Academy of Medicine and a Jewel Member of All India Ayurvedic Academy. He was appointed National Professor / GURU in Ayurveda by the AYUSH Dept. of the Government of India and President of the Scientific Advisory Committee of the Central Council for Ayurvedic Research of the Indian Government.

Karupiah Kitnan Swami Joythimayananda

Vaidya and Director of the International College of Ayurvedic Medicine and President of Ayurvedic Medicine Association in Italy.

Prof. Rama Jayasundar

Associate Professor, Department of NMR, All India Institute of Medical Sciences, New Delhi, India. Physicist (PhD from Cambridge University, UK) and Ayurveda Vaidya. Area of specialization is Bio-medical Nuclear Magnetic Resonance - RF coil designing and building, RF pulse sequence programming, clinical imaging and spectroscopy. Her work involves theoretical and experimental physics.

Dr. Gianluigi Marini

He is Head of the Department of Internal Medicine and Oncology in a Swiss Private Hospital (Clinica S. Anna) and Consultant for Liver Cancer at IOSI, the National Cancer Institute in Lugano – Switzerland.

Dr. Darshan Shankar

President of the Indian Ayurvedic and Integrated Medicine Institute and Advisor (ISM) for the Planning Commission of the Government of India, he is a Member of the Working Group of Traditional Health Sciences of the National Knowledge Commission, Government of India.

Mark Rosenberg

Founder and manager of European Academy of Ayurveda – REAA and Centre for Ayurvedic Treatment (non-profit organization), Birstein, Germany, he is Board Member of the VEAT (Professional Association of European Ayurvedic Practitioners and Therapists) the largest European Ayurveda Association.

Ayurvedic Point® srl (AP) was founded in 2001 with the aim to establish a service offering all the facilities needed for the diffusion and the development of Āyurveda. The activities of AP are mainly composed by an educational and cultural sector, the School of Ayurvedic Medicine, with two main quadrennial courses for Medical Doctors and for Therapists, and a clinical and research sector. AP has obtained the ISO 9001 certification for his procedural, research and teaching activities.

SSIMA is a no-profit association of medical doctors practicing and sustaining Ayurveda. SSIMA activities spans from cultural and research initiatives to the definitions of the educational pathways and standards as wells Deontology and regulatory framework for the practice of Ayurveda.
